New Atlantean Press. Paperback. Book Condition: new. BRAND NEW, Vaccine Guide for Dogs and Cats: What Every Pet Lover Should Know, Catherine Diodati, Veterinary vaccines are given to prevent disease, yet studies show that they are often debilitating and fatal. They have been linked to auto-immune and neurological disorders, including cancer, diabetes, arthritis, tumours, seizures, allergies, digestive problems, organ failure, and many other serious ailments. Many veterinarians, both conventional and holistic, are questioning the validity of annual revaccination. They are moving away from this arbitrary recommendation which is unsupported by science. Many also refuse to use certain vaccines because the disease in question is either so benign or rare that the risks associated with vaccination outweigh any promised benefit. This important book provides information on all canine and feline vaccines. It includes several personal stories of vaccine damage to family pets, as well as hundreds of studies documenting veterinary vaccine safety and efficacy problems. As a concerned pet owner, you can now make informed decisions about the health and welfare of your precious four-legged friends.
